Continuation of 4(e) Other: The claim markings do not completely and accurately reflect all changes made to the instant claims. For example, claim 1 as previously presented stated, "a plurality of cooperative spam control processors, each of said processor coupled to a corresponding one of said e-mail clients, wherein said cooperative spam control processors comprises programming for detecting spam and for notifying others of said cooperative spam control processors of said spam." However, according to the markings in the instant claims, the claim as previously presented would have been "a plurality of cooperative spam control processors, each of said [processor] coupled to a corresponding one of said e-mail clients, wherein said cooperative spam control processors [are configured to detect] comprises programming for detecting spam and for notifying others of said cooperative spam control processors of said spam," where the discrepancies are in marked by single brackets. Applicant should review the instant claims to ensure that the markings completely and accurately reflect all of the changes from the claims as previously presented .
